SPRAY SHIELD DIRECTED SPRAYER

The straight bar Spray Shield features a 4x6 frame, "Switchback" transport system in lengths up to 330" (8-40" rows).

The Wylie Spray Shield Directed Sprayer is the "state of the art" sprayer for Round-up Ready™ cotton. The Spray Shield applies Roundup to the weeds while protecting the cotton foliage as the shields glide beneath the cotton canopy. Available in either a straight or folding configuration, the Spray Shield is a versatile, high speed sprayer that can be used throughout the crop season.

The aluminum shields are more durable than plastic hoods since they do not crack under exposure to the sun. The shields are also protected by a parallel linkage and a rotational trip.

Folding Spray Shield

- * 8 Row-38"/40" or 12 Row-30"
- * Two Rows Flex On Each End 10°
- * Double 4x4 Frame
- * Four Gauge Wheels For Complete Control
- * 12 Row-40" or 16 Row-30"
Available On Special Frame

Spray Shield Features

- * Elliptical 300 Gallon Tank
- * Raven 203 Controller
- * Ace Centrifugal Pump
- * Wilger Tip Monitors
- * Aluminum Shields
- * 2" Quick Fill Valve

Folding Spray Shield wing flexes 10° for more versatility on terraces and uneven ground.

WYLIE SPRAYERS...that's it, that's all.

Broadcast Coverage With Directed Accuracy

General Specifications:

Overall Field Width	330"
Overall Transport Width (folding)	280"
Overall Length	103"
Capacity	300 Gal.

Back View – Spray is directed across the weeds while the shield protects the crop foliage. No need to worry about crop damage with the low-profile aluminum shield...even during those mid to late season applications.

Side View – A 15° spray angle provides more uniform coverage for better weed control.

Top View – Dual 110° broadcast nozzles under each shield cover the weeds from row to row.

*Shields rotate when obstructions are hit.
Servicing of tips is also quick & easy!*

The "Switchback" transport system on the straight bar Spray Shield makes in-line towing easy.

(Roundup™ and other herbicides should only be used on varieties that are herbicide tolerant. The Spray Shield will apply herbicide to the lower portion of the cotton stalk.)
