Shield Max Directed Sprayer

The Wylie Shield Max provides total crop protection for conventional cotton and other crops. Three spray nozzles inside each aluminum hood assures full coverage of weeds in the furrow.

The Shield Max is designed to provide years of dependable service. The aluminum hoods are more durable than plastic hoods since they do not crack under exposure to the sun. The hoods are also protected by a parallel linkage and a rotational trip.

The double 4x4 frame, 4 gauge wheels and 300 gallon tank complete the durable sprayer.
